## HIGH-SPEED ART

After nearly 6000 man hours, hundreds of sheets of hand-formed aluminum, and enough welding to construct a small aircraft, the artisans of The Creative Workshop gave birth to the Sport Speciale Roadster. This one-of-a-kind masterpiece inspired by vehicles that set new standards in performance and design, from the Ferrari TR59 and Maserati 450S to the Aston Martin DBR1, is a totally unique, ultra-exclusive sports car unlike any other.

The Sport Speciale captures the soul and lines of those late 1950s and early 1960s race cars, and connects it with modern technology that did not exist half a century ago. A 6-speed transmission and a custom-built BMW V12 with high performance cylinder heads supplied by the BMW Factory in Germany provides power, while race-bred sway bars give the vehicle smooth 21<sup>st</sup> century handling.
