**PRIVATE TOUR
CREATIVE WORKSHOP
DANIA, FL
APRIL 21, 2018**

Several months ago I had a chance to visit this place when they hosted the drivers meeting for an event called "The Drive Home".

After showing some friends the photos I took, and doing an article on the place, I was enlisted to set up a private tour for our breakfast crowd.

I contacted Jason Wenig, the owner, and he informed me that he would be delighted to give us a private tour on a Saturday. I told him not to go out of his way, but when about 20 of us arrived he had coffee & donuts for all.

PHOTOS:

(TOP) The Creative Workshops building is about as impressive as the restorations they turn out. I couldn't resist a photo of our green '47 Merc woodie along with Bob Cilio's '31 Ford coupe out front.

(BOTTOM) Three others that joined us on the tour were Mike Cunningham with his black Track Roadster, Rhett Roy with his primed Deuce 5-window, and the always present Hank Langsenkamp with his red '39 Ford convertible.

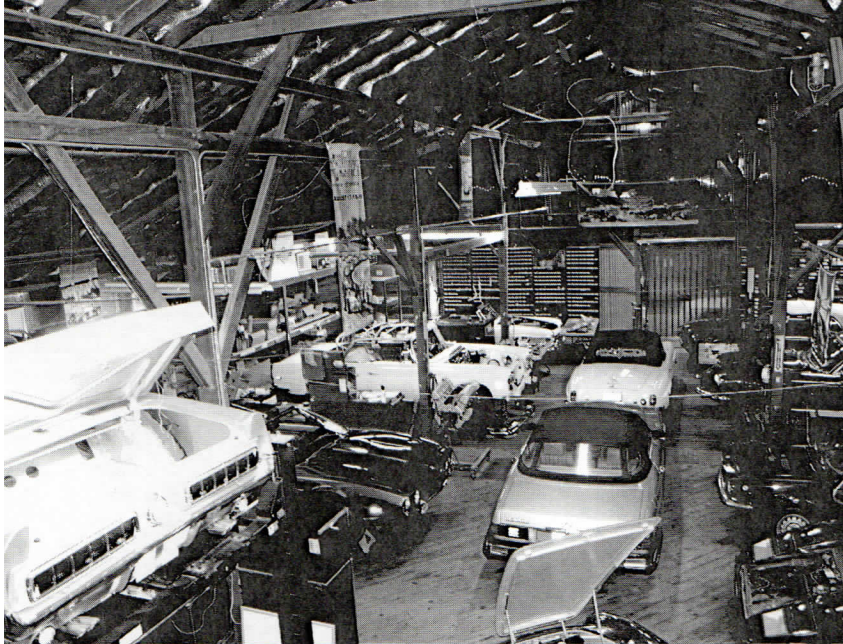

The owners hospitality was equally matched by his knowledge of all types of automobiles and the restoration process. As we made our way around the facility we observed both foreign and domestic vehicles in various stages of restoration. Many of the vehicles I had seen on my first visit were now gone, having been completed and delivered to their owners. In their place were several new projects.

They are a full service restoration facility with mechanical, paint and upholstery being done right in house. They have 13 full time employees who work very hard to see your dream vehicle on the road.

Thanks to Jason Wenig and the employees for hosting our private tour. If you've got a project, you owe it to yourself to give them a shot at your restoration.

PHOTOS:

(TOP) I grabbed this photo from the loft area. An early Chevy pick-up with an LS motor, a red Ferrari, and a blue Fiat.

(CENTER) Another shot from the same vantage point included a Mustang GT 500 on the lift, a blue Lamborghini, and three Mercedes Benz's.

(BOTTOM) This shot of the silver Chevy pick-up gives you a better look at it. In the background there is an REO Speedwagon which will be headed to Pebble Beach when completed.
