## EXCLUSIVE WHEELS

We all love vintage-inspired car creations with a modern twist, and the **Sport Speciale Roadster** by The Creative Workshop is one to go ga-ga over. This unique sports car features 1950's influences and takes its performance and design inspiration from classic behemoths like the Ferrari TR59, the Maserati 450S and the Aston Martin DBR1. Car collectors will flip over hand-built chromemoly tubular-steel "birdcage-style" chassis, a custom-built BMW V12 with high-performance cylinder heads, Brembo racing disc brakes, tubular adjustable-suspension arms, BRT rack-and-pinion steering and race-bred sway bars. Veglia instruments, an original Nardi steering wheel and Borrani wheels also adorn this beauty. The Creative Workshop custom-builds each car from scratch to clients' specifications. You can commission your own, starting at \$300,000. [www.thecreativeworkshop.com](http://www.thecreativeworkshop.com).
