Subject: Thank You and the Creative Workshop Team!

Jason,

Good Saturday Afternoon!

Another great team effort at your Creative Workshop, you really have provided a tremendous opportunity for a novice auto guy like myself.

I am not an engineer and at best I know where to but the gas. I always come away with a lot more tribal knowledge after a visit to your "Workshop."

I greatly appreciate you and your team opening up on Saturday especially in the height of the Holiday Season.

Please thank Jim Stevens for explaining to me the significance of the Horse Power to Torque Readings.

I was a little taken back when the 1970 Triumph GT6 blew a head since I am restoring a 1973 TR6 but things happen.

Please convey my heartfelt thanks to your Creative Workshop Team

Merry Christmas & Happy New Year!

Sincerely,

Kev
